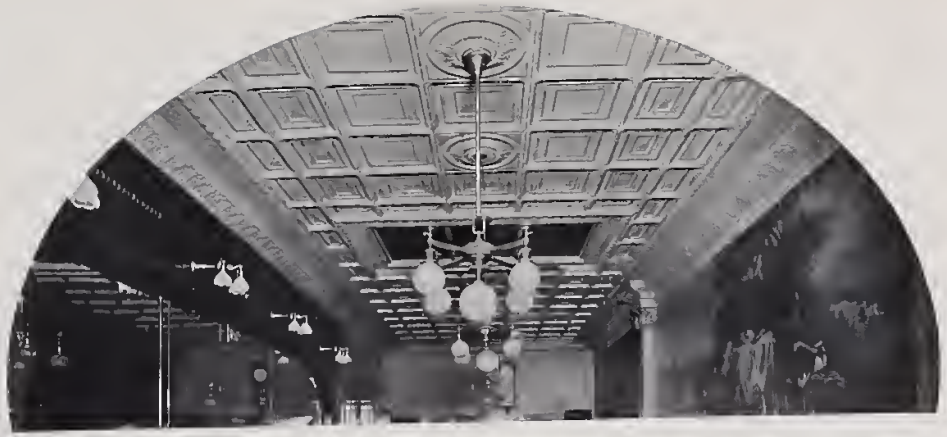
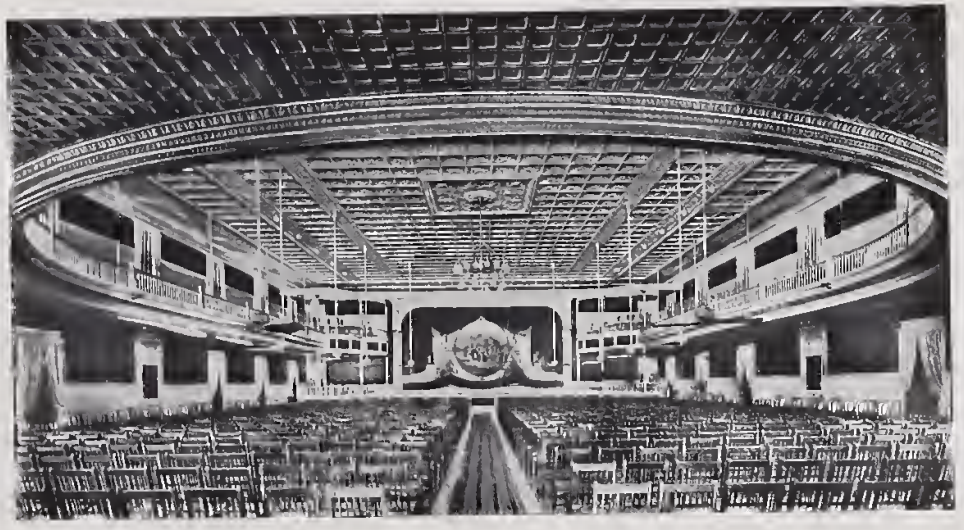
WHEELING CORRUGATING COMPANY





WHEELING METAL CEILINGS

ADAPTED TO ALL REQUIREMENTS

THE designs shown in this book have been produced after many years of experience in the manufacture and erection of metal ceilings.

Each plate, piece of molding or cornice, down to the smallest fitting, is produced with the finished ceiling in mind. The various units are carefully embossed and resquared and every other detail in the process of manufacturing is given most careful attention, making the parts fit together perfectly and quickly.

There are no raw edges, gaping seams; no poor embossing; no dissatisfaction, when WHEELING CEILINGS are used.

The kind manufactured by

WHEELING CORRUGATING COMPANY
WHEELING, W. VA.

Branch Offices and Stores:

CHATTANOOGA	Market and King Streets

INSTRUCTIONS FOR APPLYING

FURRING FOR FLAT PLATES AND SHALLOW PANELS

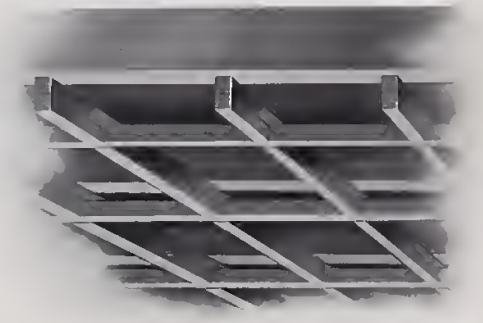
STRIKE chalk lines the length of the room at distances indicated on the blue print so that they coincide with the center lines of the nailing beads on the plates. On these lines, nail ⅞ x 1¼ inch furring strips. Between these strips and across the room, nail "headers" or cross strips at distances from center to center equal to the distances between centers of the nailing beads of the plates as indicated on the blue print. Nail strips in angle of ceiling and wall and at a distance from the wall equal to the projection of the cornice to receive the cornice brackets. Bring the strips to a uniform depth by driving wedges between the strips and the old ceiling or joists, otherwise the ceiling will present an uneven appearance when completed.

Flat plates may be applied to sheathing, in which case no furring strips will be required, but the sheathing should be level.

SINGLE FURRING

FURRING FOR PANELS DEEPER THAN ⅞ INCH

Nail furring strips the length of the room, as for flat plates, carefully leveling them with wedges. Then nail other strips at right angles on top of these, at distances from center to center equal to the distances between centers of the nailing beads of the panels, as shown on the blue print. Nail "headers" or cross strips at right angles to the last strips and on top of the first strips applied. This will bring all strips to the same level. To bring the cornice to the level of the ceiling nail one strip on top of another in the angle between the ceiling and the wall and at distance from the wall equal to the projection of the cornice.



DOUBLE OR CROSS FURRING

APPLYING THE CEILING

The Field should be applied first, then the Cornice and finally the Mold, Border or Filler as the case may be.

Beginning at one corner apply the ceiling plates across and along the room, keeping the lapping edges running from the light. Each piece should be carefully lapped so the beads will be straight and true and the joints not noticeable. The plates should be nailed at 6 inch intervals with one inch wire nails with small heads. The filler plate is lapped under the members on either side of it.

Close or "swedge" with a small dull tool any joints which may not have lapped tightly owing to the lapping beads having been bent or flattened in applying.

The list prices in this catalog are for the plates, moldings, etc., given one coat of white paint on both sides before shipping and include regular brackets and nails for applying.

FURRING STRIPS ARE EXTRA AND WILL NOT BE SHIPPED UNLESS ORDERED

WORKING PLANS

SHOWING the arrangement of material shipped, are furnished in all cases where diagrams of the rooms to be ceiled are given us, and detailed drawings showing the method of applying are made. If a diagram of the room to be ceiled is furnished, with the distances from point to point, and the size and shape of all offsets, openings and irregularities indicated, we will be able to make more intelligent estimates, and if desired submit, free of charge, a design for the approval of the customer.

In all cases inform us of the height of the room and the distance from the window and door casings to the ceiling, so that a cornice of suitable depth may be selected.

The diagrams on the next two pages indicate the measurements and information we should have to enable us to make intelligent estimates and to avoid shortages and errors in shipments.

More satisfactory results will be obtained if some choice of design is indicated when inquiry is made. However, if customer expresses no preference, we will prepare an artistic arrangement of plates suitable for the shape of the room and the purpose for which it is to be used.

When desired, we will furnish experienced men to erect the material, charging for their time, transportation and board.

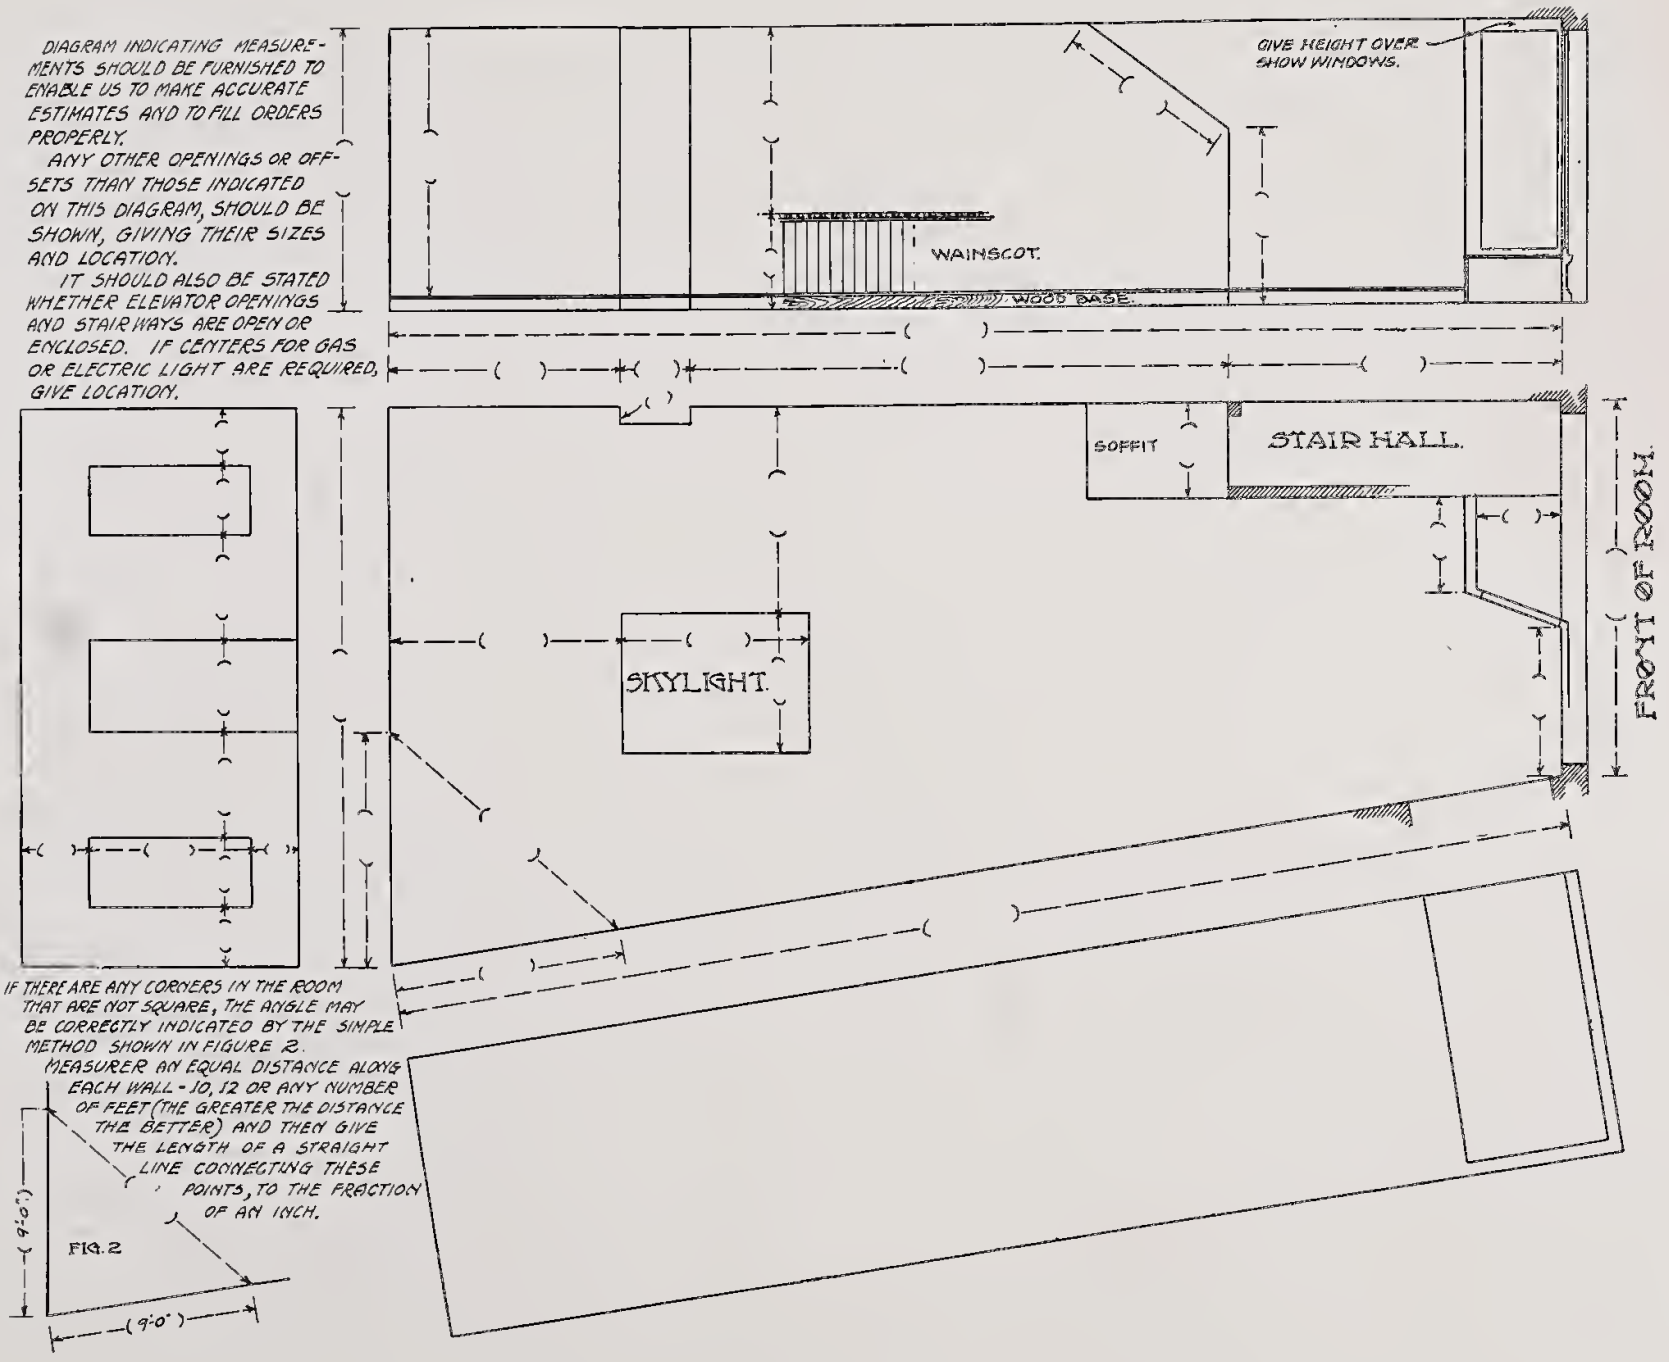
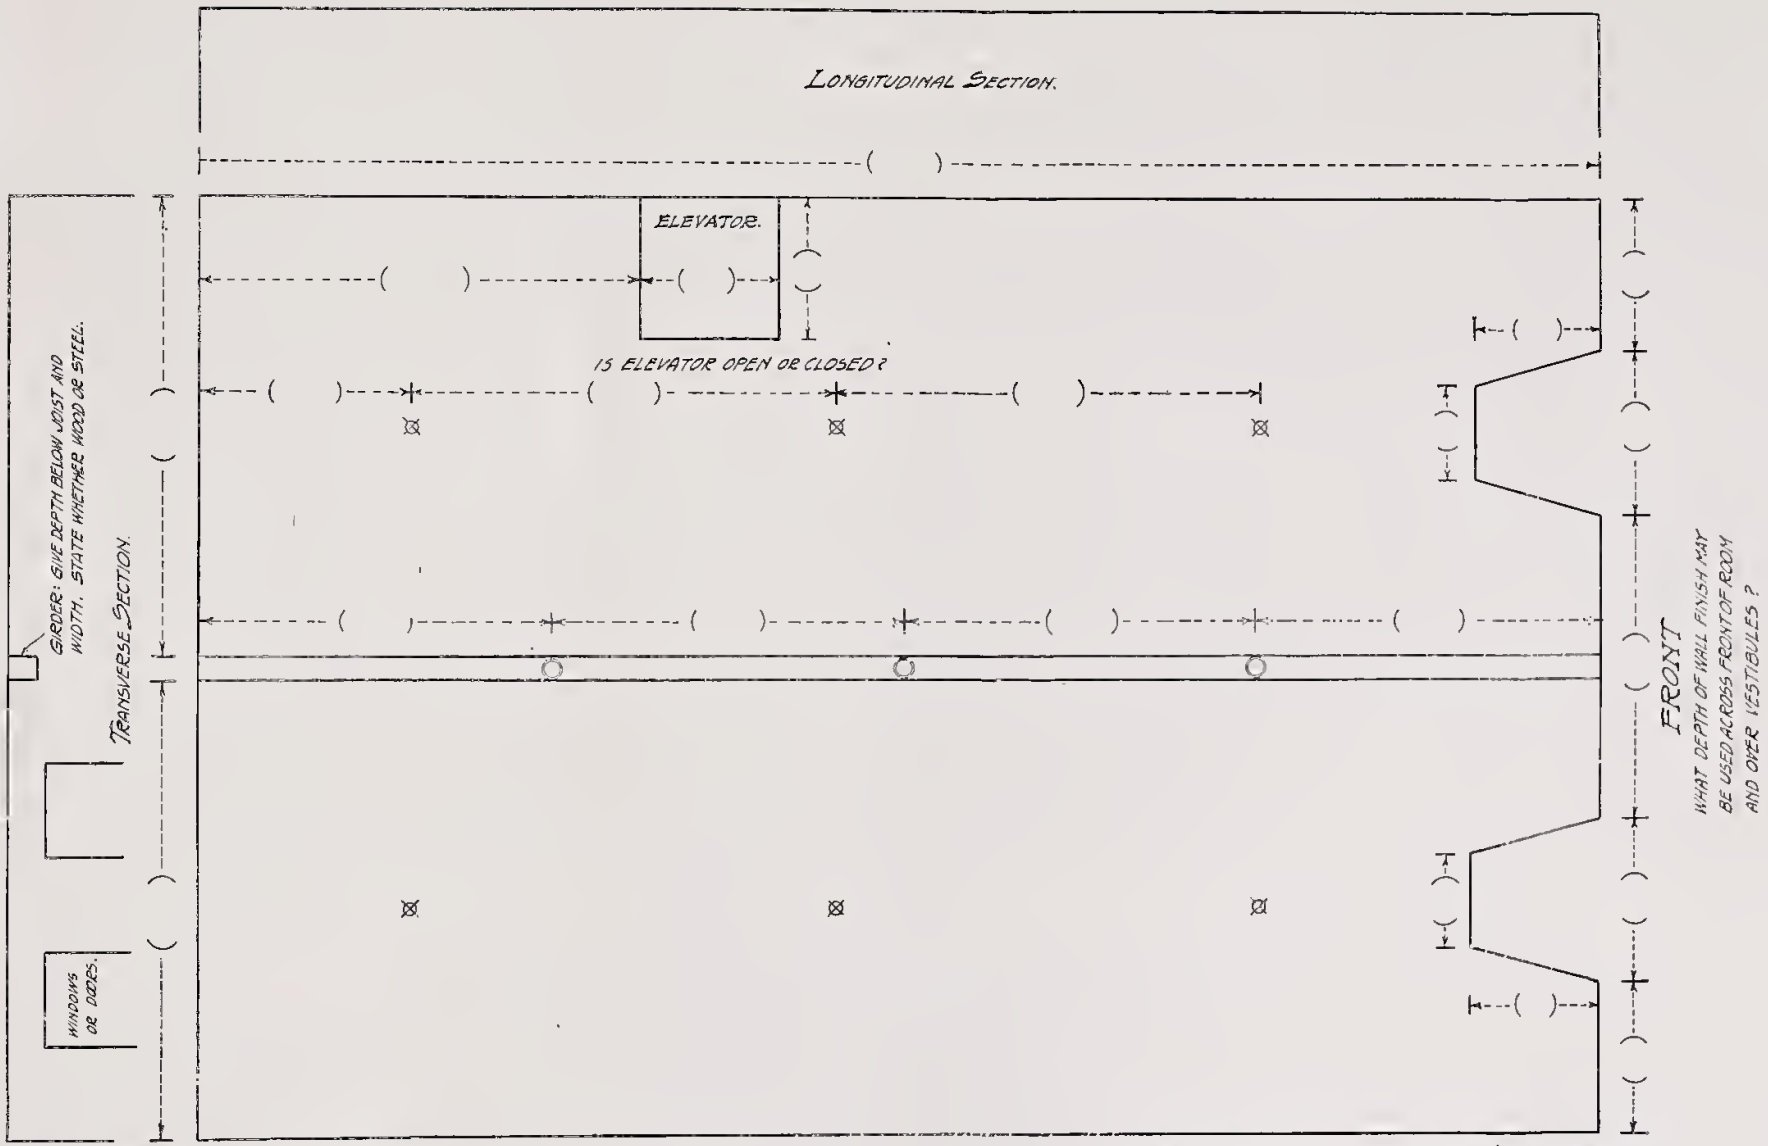
WHEELING CEILINGS—Measurement Diagram



WHEELING CEILINGS—Measurement Diagram



FOR WHAT PURPOSE IS THE ROOM TO BE USED?

IS IT NEW, OLD OR REMODELED BUILDING?

ARE THE CEILINGS AND WALLS PLASTERED?

WHAT DEPTH OF CORNICE OR WALL FINISH MAY BE USED?

WHAT IS HEIGHT OF STORY FROM CEILING TO FLOOR?

IF CENTERS ARE DESIRED, GIVE NUMBER AND LOCATION.

GIVE SELECTION OR PREFERENCE OF DESIGN WANTED.

MAKE DIAGRAM AND GIVE MEASUREMENTS AS INDICATED ON THIS ONE.

IT IS NOT ADVISABLE TO CEIL EXPOSED PLACES, SUCH AS VESTIBULES, BALCONIES AND PORCHES, WITH METAL CEILINGS, UNLESS THE SPACES ARE FIRST SHEATHED SOLID WITH BOARDS AND COVERED WITH BUILDING PAPER, TO PREVENT THE METAL FROM SWEATING.—THIS IS CAUSED BY THE UNEQUAL TEMPERATURE OF THE ENCLOSED AIR, ABOVE CEILING AND THE OUT SIDE AIR.

TERMS—Thirty days net cash, or two per cent. discount from net amount of bill for payments made within ten days from date of invoice. No discount allowed after ten days.

Bills not paid at maturity are subject to sight draft with exchange and cost of collection without further notice.

Orders from patrons about whom we have no satisfactory information, and who do not send references, will be shipped to our order; and draft, with bill of lading attached, will be sent to a local bank for collection.

Delays will be avoided if references are furnished when inquiry is made.

Claims for errors should be made upon receipt of goods. All shipments should be checked upon arrival and errors reported immediately.

If goods are shipped according to order they must not be returned without our consent. If shipment is damaged in being returned, credit will not be allowed to a greater amount than its value when received by us.

An invoice and bill of lading should be forwarded when goods are returned.

METAL SHINGLES

THE ORNAMENTAL AND PERMANENT ROOF

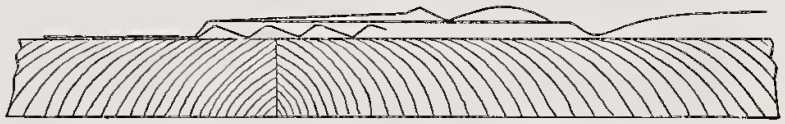
Metal Shingles are for all roofs having one-fourth or greater pitch, and are particularly adapted to bay windows, dormers, gables, mansards, porches, towers, etc., and in fact, any place where slate or wooden shingles can be used. They are also suitable for siding, and are used by many people for this purpose.

Our Metal Shingles are absolutely water-proof and weather-proof, affording the greatest amount of protection to a building and its contents.

They are fire-proof and lightning-proof, which not only increases their protective qualities, but offers a saving in the cost of fire insurance.

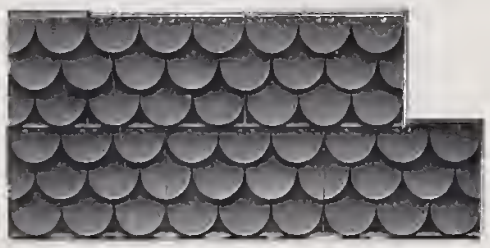
It is in the locking device that the success of our shingles lies. The accompanying profile shows our lock and how it is formed, and you will note that while the shingles fit closely together, there is sufficient room for them to automatically contract and expand.

Profile of our new lock showing how the shingles fit together when applied.



Cross section showing how the shingles overlap when applied. This overlap is a new feature.

Made from the best full weight IC Worcester grade terne roofing plate. Are galvanized or painted after being stamped.

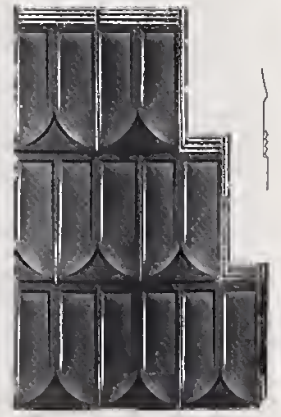


Group of Ohio Cluster Shingles
Made in one size only 20 x 28 in.

Their construction and the way they lock together and are applied form the only perfect system of contraction and expansion so essential to a good roof.

Group of Dixie Shingles
Made in three sizes 7 x 10 in.
10 x 14 "
14 x 20 "

Group of Stella Shingles
Made in one size only 10 x 14 in.



Group of Virginia Shingles
Made in three sizes 7 x 10 in.
10 x 14 "
14 x 20 "

For Full Information ask for Our Shingle Book

TERNE ROOFING PLATES

OLD STYLE TERNE PLATES, NEW METHOD TERNE PLATES, COMMON TERNE PLATES, GENUINE CHARCOAL IRON TERNE PLATES

On this page we bring to your attention our line of Roofing Plates. You will observe that there are nineteen different kinds, carrying from 8 to 47 pounds coating. Our 47 pounds coated plate—Whitaker—is the heaviest coated roofing plate that is made in the world, and every box carries the coating that is stamped on each sheet.

The greatest care is exercised in the manufacture of our Roofing Plates. We make them honestly, employ none but skilled workmen, and guarantee our different brands to be equal in quality, if not superior, to any plates that are made carrying the same weight of coating.

Every sheet of the different brands is stamped with the name, gauge and weight of coating, and any test will show that the coating we advertise is really on the plates.

We have not spent as much money as some of our competitors in advertising, but we have spent much more in making our products superior and to give our patrons exactly what they want and what they pay for. Our Roofing Plates have been tried and have proven their worth.
